Professional Summary

Front-End Developer with over 7 years of experience, currently working remotely for a US-based company. Strong expertise in Angular and React, with a proven track record of delivering high-performance, scalable web applications. Adept at cross-functional collaboration, clean code practices, and agile development. Passionate about building intuitive, responsive user interfaces with a focus on user experience and maintainability.

Currently leading UI efforts on logistics-focused enterprise systems, including Managed Receiving and Yard Management System. Open to new opportunities in the Netherlands and enthusiastic about joining multicultural, innovation-driven teams.

Technical Skills

Front-End: Angular 2+, React.js, TypeScript, JavaScript, HTML5, CSS3, SCSS, TailwindCSS

Testing: Jest, Cypress, Jasmine, Karma

Version Control: Git

Build Tools: Webpack, NPM, Yarn

API Integration: RESTful APIs, GraphQL (basic)

Agile Tools: Jira, Azure

Professional Experience

Senior Front-End Developer – Capstone Logistics (Remote, USA)

 May 2020 – Present

- Leading front-end development of two major logistics platforms:
 - Managed Receiving: A system to coordinate inbound shipment processes between suppliers and warehouses.
 - Yard Management System: A platform to track, assign, and optimize trailer movements within distribution yards.
- Built reusable, modular components using Angular and migrated selected modules to React for better scalability.
- Optimized performance and reduced load times by 35% using lazy loading and code-splitting.
- Worked closely with back-end developers (Node.js, .NET) and product teams across multiple time zones (US, Canada, Europe, and Egypt).
- Introduced unit and end-to-end testing workflows, improving code reliability and reducing QA overhead.
- Mentored junior developers and helped standardize coding conventions across teams.

Front-End Developer – Creiden (Alexandria, Egypt)

 17 Nov 2018 – Feb 2020

- Contributed to multiple client-facing web applications using Angular/React and custom CMS integrations.
- Collaborated with designers and back-end teams to ensure UI consistency and API performance.
- Enhanced website performance and SEO, improving overall user engagement.

Front-End Developer – IEREK (Alexandria, Egypt)

 17 May 2018 – Nov 2018

- Developed and maintained conference management web platforms.
- Ensured cross-browser compatibility and mobile responsiveness.
- Participated in the UI redesign of the main corporate site.

Education

Bachelor of Mechanical Engineering – Alexandria University, Egypt

 17 Graduated: 2014

Projects (Highlighted)

Managed Receiving (Capstone Logistics)

- Built interactive dashboards and role-based views.
- Integrated real-time updates via WebSockets for receiving schedules.
- Delivered a responsive UI supporting tablet and mobile screens for warehouse floor staff.

Yard Management System

- Designed vehicle tracking interface using custom Google Maps overlays.
- Created event-driven interfaces using RxJS for status updates.
- Collaborated on UX wireframes with US-based design team.
